

Don't cross that line

Driving away in the night
lights are reflecting
as they're passing by
always remember your eyes
soft tears are running
in the lonely night

Don't cross that line
it's all in you mind
you're going blind
leaving all behind

Silence will fall with no words
I'm on the road, it's
been calling my name
I'll not be coming back home
because it'll never
be the same again

Don't cross that line
it's all in you mind
you're going blind
leaving all behind

I'm leaving now, I won't be back
the night is all I have to claim
the headlights blur, the engine hums
the mirror shows a past I knew

I'm just a driver in the night
afraid to cross that line in sight
my heart is torn, my soul's a mess
I'm longing for eternal bliss

Your words still echo, haunting
like a grimm dream
it is slipping away
I'm just a ghost to you now
driving away through
the eternal night

Don't cross that line
it's all in you mind
you're going blind
leaving all behind

Don't cross that line
it's all in you mind
you're going blind
leaving all behind

I'm just a driver in the night...
I'm just a driver in the night...
I'm just a driver in the night...
I'm just a driver in the night...
